- CO2 burn technology for a cleaner burn
- Multifuel grate for burning wood and solid fuel
- Fits into most standard 16" or 18" fireplaces
- Tapered back for easy installation
- Radiant heat and natural hot air convection
- 4kw output
- Made In Ireland

The Doras Firefront

Doras Firefront

Doras is Irish for Door and this is exactly what this is. The Doras is a Firefront that can be retrofitted to most standard 16" or 18" fireplaces. This unit lets you control the burn rate of your open fire and can be used in conjunction with an existing back boiler making your fire more efficient and increasing the output of your back boiler. Just think of the wastage you have with your open fire - Solve this by fitting the Doras Firefront .

Overall Width 532mm
Overall Height 621mm

Doras side view

- Airwash system for cleaner glass
- Suits most 16" or 18" openings
- DIY installation
- Use your existing fireback and grate
- Makes the open fire controllable
- Increases the output of a back boiler
- Made in Ireland

The Fiachra 6 k.w.

Fiachra with Log Box

The Fiachra free standing is a class leader when it comes to room heating. It is big enough to heat a good size room (6kw) but small enough to sit on a standard hearth.

The Carraig Mor Double Sided

Carraig Mor Double Double Flat Top

Some people have a major dilemma when building or renovating their house i.e. 2 rooms and only 1 chimney. Well thanks to Boru Stoves the worry is over. The Carraig Mor is a double sided stove that will heat both rooms and only needs 1 chimney. It is available in both double single and double double depths and also comes in a boiler version to heat up to 10 rads or 45,000 btu's. And because it is a Boru you are assured a product of the highest quality and as you know it is made in Ireland!
