

**RIVA** OPEN CONVECTOR FIRES, CASSETTE FIRES & MULTI-FUEL STOVES

## Expert Retailer Network

We take great care to ensure that our fires and stoves are designed, tested and manufactured to the highest possible quality and safety standards We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will enable you to see a selection of models locally in their showrooms, often fully operational; discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and visual; and ensure that you select the most appropriate product for your home. These retailers will also be able to advise on or assist with the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from nationwide online sales and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Further, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

### Product Warranty

Your Stovax retailer will provide you with a Two Year Warranty for your new Riva<sup>TM</sup> fire. The second year's warranty is subject to the fire being serviced 12 months after installation & excludes certain consumable parts. Full details of these warranties are available to view at www.stovax.com

# RIVA FIRES & STOVES

### Innovation & Inspiration...

The space in which you live is an expression of your individual style. Riva<sup>™</sup> convectors, cassettes and stoves have been designed to create a striking centrepiece at the very heart of your home. Be inspired by their designs, impressed by their high levels of heating efficiency and admire their ease of control. Then simply relax in front of a real fire.

## Wood or Smokeless Fuel

Most Riva<sup>™</sup> fires have options which will allow you to burn either logs or smokeless fuel. All Riva<sup>™</sup> cassettes and stoves have a flat fuel bed because logs burn best on a level bed of ash. Smokeless fuels however, burn better on a raised grate that allows air to be drawn in from underneath. The skilful design of the Riva<sup>™</sup> range permits the combustion of either fuel with equal proficiency with the exception of the Riva<sup>™</sup> 76 cassette and the Riva<sup>™</sup> 76 Freestanding which have been designed as dedicated woodburning models only.

## Woodburning

Wood is an environmentally friendly fuel; when burnt, the carbon dioxide released into the atmosphere is approximately the same as that absorbed by the tree during growth. It is also a renewable resource, particularly when derived from plantations and cultivated woodland.

For optimum results, we recommend logs should be seasoned for 2 years or more to achieve a moisture content below 20%. This will not only give twice the output of freshly felled timber but help avoid a build up of tar in your flue. Furthermore, if you can obtain hardwood logs this is better still, as they will have a significantly increased calorific value than softwoods for the same volume.

## RIVA CASSETTES

## Outstanding Efficiency

Riva™ Cassettes incorporate the very latest cleanburn technology with a unique 'Opti-Burn' setting. This means that they burn logs or smokeless fuels with outstanding efficiency, resulting in more heat

delivery into the room and less going up the chimney. In addition to the radiant heat, a fourth airflow, between the inner and outer skins of the Riva<sup>TM</sup>, provides convected heat. This is emitted into the room naturally or, in the case of the 50, 55, 66 and 76, via an optional fan kit. These versatile cassette fires also offer the opportunity to heat other living spaces using an optional ducting system.

All Riva<sup>™</sup> Cassettes direct three types of air into the glass-fronted firebox, where they combine to provide superb flame control and exceptional views of the fire which are further enhanced by Stovax's Airwash system that helps keep the glass clean.

### Smoke Control Area Approved

Many of the Riva<sup>™</sup> Cassettes in this brochure are approved for the burning of logs in Smoke Control Areas (when the appropriate smoke control kit is fitted) and this is shown on the relevant product pages. Your Stovax retailer can give you further help and advice.

## Key Design Features

- 1. High density, thermal brick liner system.
- 2. Heated air jets from cleanburn ports on all three sides burn hydrocarbons in smoke.
- 3. Unique stainless steel baffle (multi-fuel).
- 4. Single combustion control lever.
- 5. Unique "Opti-Burn" setting provides optimum efficiency and visual effect for woodburning.
- 6. Airtight door with removable stainless steel handle.
- 7. Convected and radiant heat.
- 8. Externally operated riddling grate.
- Convected heat ducting system outlets (Riva 50, 55, 66 & 76 cassettes only).
- 10. Easy fit flue connection through cassette.
- 11. Removable stainless steel ashpan.
- 12. Optional cast iron, smokeless fuel 'reducing' kit<sup>†</sup> (not illustrated)
- 13. Optional stainless steel tool holder (not illustrated)
- 14. Optional fan-assisted convection system (Riva 50, 55, 66 & 76 cassettes only not illustrated)
- 15. Optional ash caddy (not illustrated)
- <sup>†</sup>Required if smokeless fuel is to be used regularly

## RIVA CASSETTE SIZES

The outstanding Riva<sup>TM</sup> Cassette fires range is available in six different sizes offering greater installation possibilities for interiors of all proportions. With three portrait, two landscape and one virtually square size, the beautifully designed Riva<sup>TM</sup> fires are the perfect blend of versatility and style.

Available in a choice of Jet Black Metallic or Storm, the Riva<sup>TM</sup> frame options have been designed to specifically complement the contemporary visuals of the Riva™ Cassettes range. Choose from standard or wide Profil frames, both of which are available in 3 or 4 sided versions, depending on whether you want a traditional hearth mounted fire or a more contemporary 'hole in the wall' installation. Alternatively, opt for the contemporary styling of the Riva 66 Avanti which incorporates a subtly curving front section finished in Storm Metallic; a striking contrast to the Jet Black rear.

Furthermore, Stovax have introduced a range of new and vibrant colour options for the Profil frames in the Riva™ Cassette range. Look for the colour symbol on the relevant product pages for easy reference and see page 27 for further details.

	Nominal Heat Output	Dimensions mm (wxhxd)	Max. log length	Max. Efficiency
Riva 40	4.9kW	400 x 550 x 350	250mm	82%
Riva 45	5.0kW	400 x 660 x 350	250mm	83%
Riva 50	7.0kW	540 x 550 x 350	350mm	83%
Riva 55	8.0kW	540 x 660 x 350	350mm	84%
Riva 66	8.0kW	650 x 550 x 395	450mm	80%
Riva 76	9.0kW	760 x 630 x 395	510mm	78%

Please note the above information is

an overview only. For further technical

information please see pages 56 - 57.

4 Sided Standard Profil Frame

Riva 55

4 Sided Wide Profil Frame

Riva 66 Avanti

Riva 66

Riva 76

The smallest model in the Riva<sup>™</sup> Cassette range has been specially designed to fit into a standard 22″ (560mm) high x 16″ (405mm) wide British fireplace opening with the chairbrick removed. So you can now update the look of your living room with minimal construction work and, possibly without even the need to remove the existing hearth and mantel. Alternatively, the Riva<sup>™</sup> 40 can be installed as a 'hole in the wall' fire.

In addition to providing excellent contemporary style, installing a Riva<sup>™</sup> 40 significantly increases the level of heat in your room when compared to a conventional open fire. Combustion efficiency is up to four times greater; giving you more heat for your money and lower fuel costs.

Both the cassette fire and frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. However, there are four additional frame colour options available to expand your interior design possibilities as shown on pages 26 - 27. The Riva<sup>TM</sup> 40 is also approved for the burning of wood in Smoke Control Areas\*, so this compact and contemporary cassette can add style to your home, wherever your location!

Additional options for the Riva™ 40 can be found overleaf.

\*When fitted with a Smoke Control Kit and used in accordance with the operating instructions.

Slightly taller in stature, the Riva™ 45 has the same clean and contemporary look as its smaller counterpart but with a higher heat output of up to 5kW. It can be fitted into a 36″ high fireplace opening.

Install your Riva<sup>™</sup> 45 as either a 'hole in the wall' fire with a 4-sided frame or on a hearth with a 3-sided frame.

The choice of smart Storm or Jet Black Metallic finishes which come as standard on all our Riva<sup>™</sup> Cassettes can be complemented with one of four striking colours for the Profil frame. Choose either Metallic Red, Metallic Blue, Metallic Bronze or Ivory, to inspire a bold new look for your home (see pages 26 - 27).

Giving a wonderful view of the radiant, dancing flames, the Riva<sup>™</sup> 50 is an impressively efficient new edition to the Riva<sup>™</sup> family. With clean, contemporary lines designed to fit into a 22" high and wide fireplace opening, the Riva<sup>™</sup> 50 can be installed with relative ease on to a hearth with a 3 sided frame, or with a 4 sided frame to create a 'hole in the wall' look.

Furthermore, the option of a fan-assisted convection circulation kit provides for quicker heat delivery into the room when first lit. The Riva™ 50 has also been approved\* for the burning of wood in Smoke Control Areas when fitted with an optional Smoke Control Kit.

#### **Right:**

Riva 55 wih standard 4 sided frame in Storm with handle removed. The optional tool holder is also shown.

Providing greater heat output and a larger window to view the swirling flames, the Riva™ 55 can be installed into a fireplace opening that is 915mm h x 915mm w x 460mm d (36"h x 36"w x 18"d).

The Riva<sup>™</sup> 55 offers you two accessories to enhance your heating options. The first is fan-assisted convection for quicker warming of the room when the Riva<sup>™</sup> is first lit. The second is a ducting system that can distribute warm air into the same room or to other living spaces. Installing the fan and ducting system together really will maximise the benefits from this impressive 8kW cassette fire.

Both the cassette fire and frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. There is also a choice of four supplementary colour frame finishes to further enhance your styling options.

§ Required if smokeless fuel is to be used regularly.

Not only will this magnificent landscape cassette fire provide you with significant heating capacity but it will also be a stunning focal point in your living room. Although it is possible for the Riva<sup>™</sup> 66 to be fitted into certain 'fireplace openings', to achieve such installations the deep versions of the Profil frames may be required to accommodate the extra depth of the firebox. Alternatively, this model is ideal for new-build homes, barn conversions or where major refurbishment is taking place, and a larger opening can be constructed.

If you expect to burn smokeless fuel then, due to the larger firebox, a smokeless fuel 'reducing' kit must be fitted. Not only does this decrease the amount of fuel you need to load but it also guides the fuel and cinders towards the grate for improved combustion. However, you may still burn wood with equal efficiency.

You can optimise the heating potential of the Riva<sup>™</sup> 66 with two accessories. Firstly, a fan-assisted convection kit, which boosts warm air entering the room at the flick of a switch. Secondly, a ducting system that diffuses some of the heat to other points in the same room or into other living spaces. Or install both the fan and ducting system for ultimate heat distribution.

Both the cassette fire and frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. There is also the option of specifying one of four exciting supplementary frame colours.

Additional options for the Riva™ 66 can be found overleaf. Further images on front cover, and page 5.

## RIVA | 66 AVANTI

Sharing exactly the same firebox features as the standard Riva<sup>™</sup> 66, the Avanti differs only by its more contemporary styling - offering a design statement in its own right.

Above and below the door there are finely proportioned Jet Black steel panels, whilst the door itself is gently curved and finished in Stovax's Storm paint. The door handle locates on the right and may be removed after refuelling. The controls are discreetly positioned under the door so all you see are the crisp, clean lines of the Avanti surrounding a swirling picture of flames.

If you are considering burning smokeless fuel then a cast iron, smokeless fuel 'reducing' kit is required. This allows you to load less fuel into the firebox and obtain even greater heating economy (plus you can still burn wood with equal efficiency). Another practical option available for the Riva<sup>™</sup> 66 Avanti is a ducting system that distributes some of the heat produced to other points in the same room or into other living spaces.

Further image on page 27.

A woodburning model only, the largest cassette in our range offers not only a truly panoramic view of the flames but also provides you with powerful heating performance. Additionally, its larger dimensions make the Riva<sup>™</sup> 76 particularly suited to new, architect-designed homes or where renovation work to an existing, larger property is being considered.

As with the Riva<sup>™</sup> 55 and Riva<sup>™</sup> 66, the 76 is complete with an 'Opti-Burn' setting for maximum fuel efficiency. However, it can also be specified with a fan-assisted convection kit and a ducting system as an additional option. The fan-assisted convection kit provides an immediate boost of warm air into the room at the touch of a switch whilst the ducting system allows you to distribute some of the heat to other parts of the same room or to adjacent spaces.

Both the cassette fire and the frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. There are also four additional frame colour options available - please see pages 26 - 27.

# RIVA | COLOUR FRAME OPTIONS

For those who want to add a splash of colour to their living space, Stovax has introduced a range of new and vibrant colour options for the Profil frames in the Riva<sup>TM</sup> cassette range.

There is a choice of 4 eye-catching colours to choose from: Metallic Red, Metallic Blue, Metallic Bronze & Ivory. Please use the following suffix for your chosen colour:

- Metallic Red (RD),
- Metallic Blue (BL),
- Metallic Bronze (BZ)
- Ivory (IV).

ONAL COLOLIAN

For example: Profil frame for Riva™ 40, 3 sided, standard in Metallic Blue: RV40PRO3BL.

# RIVA STOVES

## Outstanding Efficiency

Stovax Riva<sup>™</sup> Stoves all feature the latest cleanburn combustion systems, allowing them to burn logs or solid fuels with outstanding efficiency, resulting in more heat delivery into the room and less going up the chimney. This technological advancement is achieved by introducing pre-heated, secondary air into the firebox to burn the excess hydrocarbons in the smoke. Airwash air flow also helps keep the window clean, allowing you to enjoy the flames to the full.

### Smoke Control Area Approved

Many of the Riva<sup>™</sup> Stoves in this brochure are approved for the burning of logs in Smoke Control Areas (when the appropriate smoke control kit is fitted) and this is shown on the relevant product pages. Your Stovax retailer can give you further help and advice.

## Riva Freestanding Key Features

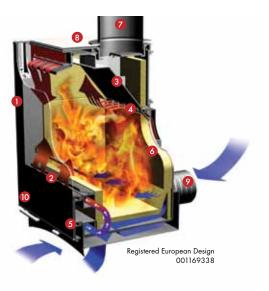

- 1. High density, thermal brick liner system.
- 2. Heated air jets from cleanburn ports on all three sides burn hydrocarbons in smoke.
- 3. Unique stainless steel baffle (multi-fuel).
- 4. Two combustion control levers.
- 5. Unique "Opti-Burn" setting provides optimum efficiency and visual effect for woodburning.
- 6. Airtight door with removable stainless steel handle.
- 7. Convected and radiant heat.
- 8. Externally operated riddling grate.
- 9. Top or rear flue exit connecting stove to flue pipe.
- 10. Removable stainless steel ashpan.
- 11. Optional cast iron, smokeless fuel 'reducing' kit<sup>†</sup> (not illustrated).
- 12. Optional stainless steel tool holder (not illustrated).
- 13. Optional ash caddy (not illustrated).

### Riva Vision Key Features

- 1. Heavy duty steel body.
- 2. Airtight contemporary glass door.
- 3. Stainless steel baffle.
- 4. Heated air jets from cleanburn ports burn. hydrocarbons in smoke.
- 5. Single lever for state-of-the-art control of cleanburn combustion and airwash system.
- 6. High density, thermal brick liner system.
- 7. Top or rear flue exit connecting stove to flue pipe.
- 8. Optional ceramic glass top plate .
- 9. Optional external air facility for draught reduction.
- 10. Stainless steel controls and log guard.
- 11. Optional Smoke Control Kit (not illustrated).

## RIVA | F40 FREESTANDING

Incorporating all the latest firebox technology of the Riva<sup>TM</sup> 40 cassette, the Riva<sup>TM</sup> F40 Freestanding is a compact stove offering stylish lines and impressive heating performance. It has full multi-fuel capability (complete with 'Opti-Burn' setting), airwash to help keep the glass window clear, externally operated riddling (accessed via the special ashpit door) and a choice of top or rear flue exits.

In addition to hearth-mounting, there is a choice of ten Riva<sup>™</sup> Benches available (please see pages 42 - 43 for details) to provide alternative styling options.

The Riva™ F40 Freestanding is finished in a choice of Stovax's Storm or Jet Black Metallic paints.

Further images of the Riva™ F40 Freestanding on pages 43 and 63.

## RIVA | F66 FREESTANDING & PEDESTAL

If you are looking for the greater heating performance of the multi-fuel Riva<sup>TM</sup> 66 cassette but wish to combine this with the hearth-mounted appeal of a contemporary stove then the F66 Freestanding provides a stylish, contemporary solution.

Additionally, you can consider two options to provide you with alternative interior design choices. Firstly, the F66 Freestanding can be placed on the Riva<sup>™</sup> Bench (please see pages 42 - 43 for details). For this model, you can select either the 100cm, 120cm, 140cm or 180cm versions according to your requirements. Each will present a distinctive focal point whether freestanding in an open living space or positioned in a larger fireplace opening.

The second option is the Riva<sup>™</sup> Pedestal which allows the F66 Freestanding to attain more of the appearance of a stove. The Pedestal is available in black only and raises the F66 223mm from the floor.

The Riva™ F66 Freestanding is available in two metallic paint finishes: Storm or Jet Black.

# RIVA | F76 FREESTANDING

Fire sizes	F76 Freestanding
Nominal heat output	9.0kW
Maximum efficiency	78%
Maximum log lengths	500mm (20")
Flue connection (internal diameter)	153mm (6″)

#### Above:

Riva F76 Freestanding in Jet Black Metallic with removable handle in situ. Also shown: Ironworks toolset also available from Stovax.

> **Right:** Riva F76 Freestanding in Storm with removable handle in situ.

Wider still than the F66, the F76 Freestanding is a woodburning appliance only. However, it has the potential to create an outstanding landscape centrepiece within larger rooms or living spaces. Particularly as the airwash system helps keep the extensive window clear, allowing you to enjoy the flames to the full.

The cleanburn technology and 'Opti-Burn' setting also offers you powerful, yet efficient, heating capacity. With up to 9kW available, the prospect of cosy winters in front of a real log fire awaits you.

The F76 Freestanding can be hearth-mounted or, for an alternative style and look, placed on either a 100cm, 120cm, 140cm or 180cm Riva™ Bench. Details of Riva™ Benches can be found on pages 42 - 43.

Choose from Stovax's Storm or Jet Black Metallic paint finishes.

# RIVA VISION | SMALL

The compact and sleek look of the Riva<sup>TM</sup> Vision Small encapsulates the defining characteristics of this range of contemporary stoves.

Featuring a stunning black glass door that gives you the best possible view of your fire, this stylish stove will give a generous heat output of up to 5.0kW. With many optional extras available such as the Ceramic Glass Top or Riva™ Plinth with matching glass front, your styling possibilities are extended even further.

For a compact stove, the Riva™ Vision Small makes a big impact.

# RIVA VISION | MIDI

Featuring the same clean, geometric form and reflective detailing, the Riva™ Vision Midi offers an impressive heat output of up to 6.5kW.

Available in woodburning or multi-fuel models, the Vision Midi offers many optional extras including the external air kit allowing air to be drawn from the outside, minimising drafts in your room as well as a gloss black flue pipe to really personalise your stove.

The addition of a Riva<sup>™</sup> Bench can really extend your individual styling options. Details of Riva<sup>™</sup> Benches can be found on pages 42 - 43.

## RIVA | BENCHES

To assist designers and homeowners in creating a flexible alternative to the 'on hearth' mounting of Riva<sup>TM</sup> Freestanding and Riva Vision stoves, Stovax offers ten sizes of Bench to which the stoves may be secured.

Standing 250 or 350mm high with a sturdy steel construction and a durable black finish, you can not only match the Bench to the space available but also accommodate individual styling requirements. For example, appliances can be positioned centrally on the Bench or offset to one side. Finished in a durable Matt Black the Riva<sup>™</sup> Benches can provide either the perfect complement or create a striking contrast depending on your stove colour choice.

The lengths available are 45cm, 100cm, 120cm, 140cm and 180cm with a depth of 420mm ( the 180 Bench has a depth of 465mm), and the legs are each 60mm wide.

## RIVA | F40 & F55 AVANTI

Fire sizes	F40 Avanti	F40 Avanti Midi	F40 Avanti Highline	F55 Avanti Midi
Nominal heat outputs	4.9kW	4.9kW	4.9kW	8.0kW
Maximum efficiency	81%	81%	81%	77%
Maximum log lengths	250mm (9³/4″)	250mm (9³/4″)	250mm (9³/4″)	350mm (13³/₄″)
Flue connection (internal diameter)	128mm (5″)	128mm (5″)	128mm (5″)	128mm (5″)

The Riva<sup>™</sup> Avanti stoves range features contemporary styling that would suit either a modern or traditional living space.

The Riva<sup>TM</sup> F40 Avanti may be the smallest model of the four yet it still boasts an exceptionally powerful heating capacity. For slightly taller fireplaces or as the centrepiece to an open plan space, the F40 Avanti Midi and Highline models offer not only extra height, but also a convenient storage compartment.

Creating a greater impact than the F40 version, the F55 Avanti Midi has been created for larger openings and spaces. So there is an even greater view of the fire and extra heat output available – up to 8kW.

All the Riva<sup>™</sup> Avanti stoves boast all the features of the Riva<sup>™</sup> range such as cleanburn technology, airwash system to help keep the window clear, multi-fuel operation and external riddling.

The Riva<sup>™</sup> Avanti range is finished in a combination of Stovax's Storm and Jet Black Metallic paints.

# RIVA OPEN CONVECTOR FIRES

## Improved Heating Performance

Everyone loves the warmth and atmosphere of an open fire with dancing flames, crackling logs or glowing coals. Unfortunately, open fires are not always very efficient at heating your room. An exception to this, the latest Riva<sup>TM</sup> Open Convectors from Stovax provide you with the best of both worlds – a real open fire yet with a heating efficiency double that of a normal grate or hearth mounted appliance. This is because the Riva<sup>TM</sup> Open has been designed to produce warm convected air as well as radiant heat.

## Versions for most chimneys

Suitable for most homes (if your house has a chimney<sup>\*</sup> you can almost certainly install a Riva<sup>™</sup> Open), these versatile convector fires are available in five widths and two different heights so that they may be fitted into a wide variety of fireplace types and heat rooms of different proportions. There is also a choice of decorative styles to complement both traditional and contemporary interiors.

\*Conforming to Building Regulations for solid fuels. If unsure, please check with your Stovax retailer.

## Convector Efficiency

Riva<sup>™</sup> Open Convectors have been specially designed to draw in cooler, ambient air and heat it in the convection chambers positioned either side and behind the visible 'firebox'. The warmed air passes out into the room through the top air vent, adding to the radiant heat emitted by the fire. Furthermore, there is an air control (operated by a removable handle) which allows you to have maximum draught for lighting the fire but, once ablaze, an even more efficient burn can be achieved by reducing the air flow. This control can also be partially closed when the fire is out to reduce down draughts from the chimney.

## Key Design Features

- 1. Cooler air drawn in
- 2. Specially designed convection chambers
- 3. Warmed convected air flows into room
- 4. Design allows chimney to be swept
- 5. Removable multi-grate and damper control tool
- 6. Removable tray/pan for disposal of ash/cinders
- 7. Dual skin construction in heavy gauge steel

# RIVA | 16/22/24/26/28 TRADITIONAL

Low lintel options	1	1	1	1	x

Please see page 50 for frame information.

Not just a model but a range in itself, the Riva<sup>™</sup> Open Traditional Convectors are available in five widths and two heights to suit the broadest possible variety of fireplace types and living spaces. Furthermore, the subtle styling allows the Riva<sup>™</sup> Open Traditional to blend easily with any style of fireplace from mellow stone to rustic brick and from classic marble to polished slate, so the opportunities to create a distinctive focal point in your home are immense.

For the burning of smokeless fuels there is a cast iron grate/ashpan whilst for woodburning you need to select a log tray together with your choice of log retainer front.

Frame information for the Riva™ Open Traditional range can be found on page 50.

#### **Right:**

Riva Open 16 Arts with black Holyrood front. Shown here with Pembroke surround (3567WW) which is also available from Stovax. At its peak in the 1920s and 1930s, the Arts movement blended aesthetic appeal with technology to bring a clean new look to virtually any object in daily use. Today, this evocative style is still influencing contemporary design.

The Riva<sup>TM</sup> 16 Arts Open Convector echoes the look of that era with a beautifully curved frame that is finished in a subtle Matt Black to complement perfectly your choice of Holyrood or Portcullis front for a superb log burning fire. Alternatively, select the cast basket for burning smokeless fuels.

The Riva™ 16 Arts Open Convector is finished in Matt Black.

Please note the minimum distance to combustible materials for the Riva<sup>TM</sup> cassettes is 300mm, with the exception of the Riva<sup>TM</sup> 76 for which you should allow 150mm. For full details please refer to the installation manual. A HETAS approved installer should undertake a site survey prior to purchase and must install any Riva Cassette Fires. Your Stovax retailer will be able to advise on this and, in particular, the use of high temperature (1300°C) plaster/screed in the area around Riva Cassettes. You may view/download complete installation instructions at our website - www.stovax.com. These diagrams cover some of the basic requirements. All fires and stoves should be installed by a competent person to the requirement of Building Regulations (Document J) and include the fitting of adequate ventilation to ensure safe use. Usually older buildings do not need any additional ventilation for appliances up to 5kW, but modern houses will need additional ventilation in all cases. Some models can be fitted with an optional External Air Kit, or dedicated external air supply, offering a discreet and draught reducing solution to standard room venting.

#### **RIVA CASSETTE PROFIL SPACER FRAMES**

Like all Riva<sup>TM</sup> cassettes the Riva<sup>TM</sup> 66 and Riva 76<sup>TM</sup> fires can be to fitted into a 350mm fireplace recess. However to achieve such an installation the innovative Profil Spacer Frame shown below should be used to accommodate the additional depth of the firebox.

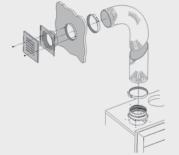

Standard (7mm deep)

<sup>†</sup>Spacer Frame (50mm deep)

#### WARM AIR DUCTING KIT

The kit, for the cassettes only, includes two 3 metre lengths of flexible ducting, allowing you to distribute up to half of the heat output to two other living spaces, extending the heating potential throughout your home.

\* For stove benches to go with the Freestanding models, please see pages 42 - 43.

<sup>†</sup> Flame viewing area

A HETAS approved installer should undertake a site survey prior to purchase and must install any Riva Stove for you. Your Stovax retailer will be able to advise and assist. You may view/download complete installation instructions at our website - www.stovax.com. These diagrams cover some of the basic requirements. All fires and stoves should be installed by a competent person to the requirement of Building Regulations (Document J) and include the fitting of adequate ventilation to ensure safe use. Usually older buildings do not need any additional ventilation for appliances up to 5kW, but modern houses will need additional ventilation in all cases. Some models can be fitted with an optional External Air Kit, or dedicated external air supply, offering a discreet and draught reducing solution to standard room venting.

## RIVA OPEN INFORMATION

A HETAS approved installer should undertake a site survey prior to purchase and must install any Riva Open Convector Fire. Your Stovax retailer will be able to advise on this and, in particular, the use of high temperature (1300°C) plaster/screed in the area around the fire. You may view/download complete installation instructions at our website - www.stovax.com. These diagrams cover some of the basic requirements:

### Optional Log Retainers

Portcullis front

With the Riva™ Open Contemporary, you have a choice of log retainer styles.

3 bar log retainer (wood only)

4 bar log retainer (multi-fuel only)

#### Solid log retainer (wood & multi-fuel)

### Sparkguards

Clip-in sparkguards. For security and peace of mind when the Riva™ Open is left unattended, these guards will help to prevent sparks from entering the room.

Please note: the above image shows a Riva Traditional Sparkguard.

# FURTHER INFORMATION

## Smokeless Fuel 'Reducing Kit'

If you expect to burn smokeless fuels with a Riva™ Cassette or Riva™ Freestanding stove then you will need to fit the Smokeless Fuel 'Reducing' Kit. By placing the cast iron guides into the base of the firebox, you will decrease the amount of fuel you need to load and allow the fuel and cinders to fall towards the grate for improved combustion. However, you may still burn logs with equal efficiency.

### Care of your Riva

To help you get the best performance from your Riva™ and keep it in good condition, inside and out, Stovax offers a wide range of cleaning and maintenance products. Stovax also supply a wide variety of fireplace accessories, of which your retailer will be able to provide you with full details or you may view the complete range at **www.stovax.com**.

## Professional XQ<sup>™</sup> Chimney Systems & Enamelled Flue Pipe

Stovax also offers a comprehensive range of stove & fireplace chimney systems, the Stovax Professional XQ<sup>TM</sup> collection. Crafted from 304L grade stainless steel for a durable outer finish, the fully sealed components offer water tight protection for the insulation within. With innovative decorative options, the ability to specify a colour for your system and with a host of technical advancements such as its Twist-Lock system, the Professional XQ<sup>TM</sup> range provides an attractive, versatile and reliable solution for your flue system. Furthermore, the Professional XQ<sup>TM</sup> range carries a 10 year conditional warranty offering complete peace of mind.

As part of the Professional XQ<sup>TM</sup> range Stovax also offers high quality enamel flue pipe, allowing you to fully co-ordinate the installation of your Riva<sup>TM</sup> stove. This includes Stovax's Modern Line flue pipe range with vitually seamless joins guaranteeing an attractive, ultra-contemporary designer statement. The flue pipe diameters required for each model are given on each of the product pages. Below is a selection of flue pipe components you may need, to view the full range or for more information please speak to your retailer or visit **www.stovax.com/chimneysystems** 

#### ENAMELLED FLUE PIPE PRODUCT CODES

$90^{\circ}$ tee piece with end cap (for rear exit)	4516GB	4616GB			

## Warranty & Safety Details

Your Stovax retailer will provide you with a Two Year Warranty for your new Riva™ Convector, Stove or Cassette Fire. This warranty is subject to the appliance being installed in accordance with the manufacturer's instructions and the second year's warranty is dependent on the appliance being serviced within 12 months of installation by an appropriately qualified engineer. This warranty does not cover certain wearing parts or 'consumables' or the use of unauthorised fuels.

Stovax pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

Please note that all parts of these stoves and fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm. Furthermore, by law all installations also require a Carbon Monoxide monitor (such as product code 3045 available from Stovax).

## Colours/Flame Pictures

Owing to variations in studio lighting and printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples.

All fire and flame photography has been taken from genuine products, however, the exact appearance of the flame picture for any appliance will vary depending on the nature of the flue type, installation surroundings, local geographical features and the way in which the appliance is operated.

## Fireplace Tile Surrounds

The space in which you live is an expression of your individual style - and at the very heart of your home is the fireplace. It is a focal point that not only extends the warmest of welcomes to your family and friends, and the one around which they will gather naturally, but it also offers you the opportunity to make a design statement that marks out the room even when the fire is not lit.

WAX SIDEO

A unique collection, currently comprising 35 porcelain and natural stone tiles, has been carefully selected to help you give your home the ultimate look. Please ask your Stovax retailer for details or download the latest brochure from **www.stovax.com**.
